SKILLS

Programming Languages:
HTML5, CSS, Javascript, Python

Frameworks:
React.js, Express.js, Node.js, Django

Databases and Tools:
REST API, Mongoose, MongoDB, PostgreSQL

PROJECTS

Book Bucket List
- Book tracking application with full CRUD functionality developed solely using Django/MVT design pattern and PostgreSQL.

Ghibli 🔗
- React movie application which users can view all Studio Ghibli movies as well as details about each individual movie.

Flash Cards 🔗
- Javascript application multiple choice game which users can test their knowledge on HTML, CSS and Javascript basics.

GroundUp 🔗
- Full stack CRUD event tracking app which users can add/delete events. Developed with React for frontend and Express & MongoDB for backend.
